Safety training

Last modified April 6, 2026

Important: *We've moved all virtual safety trainings and webinars to Microsoft Teams Webinars. To help your session run smoothly, we recommend creating a Microsoft Teams account and installing the free Teams app before your training.*

If you don't install Microsoft Teams beforehand, you will be prompted to download it when you enter the course. The process will take 5-10 minutes to complete.

If you previously registered for a BWC training course via WebEx, your registration has already been transferred to Microsoft Teams. Before your course begins, you will receive an attendance link via email from Microsoft Teams that will allow you to join the session.

We offer a variety of training courses in multiple formats to help you find the information you need in a format that fits your schedule. We offer in-person training, virtual training classes, online courses, webinars, and blended learning.

Our safety education & training program is run through the [BWC Learning Center](#). To get started, you must [create a separate BWC Learning Center login](#) to register for a class. You can also access

In your **GOOGLE CHROME** browser go to: <https://info.bwc.gov/for-employers/safety-service/training-and-resources/training>
